# scout wireless home security

## Personalized Home Security

Scout's platform keeps you at the center of your security. From purchase, to installation, to everyday use, we've thoughtfully designed every aspect of the system to provide maximum security, while staying out of your way. Control Scout from your smartphone, tablet or computer anytime, anywhere in the world. With customizable notifications, personalized styling and 24/7 mobile access, Scout keeps you on-the-go, in control and interruption free.

## Simple, but Robust

Buying home security and home automation devices can be a frustrating process. Relax, we've got you covered. The Scout experience has been curated to make security drop-dead simple from end-to-end. You don't have to know anything about the state-of-the-art technology that drives Scout, but you'll be happy it's there when you need it. Whether you're installing for the first time, adding components or integrating Scout with other smart home devices, it just works.

# empowering software

## 24/7 Mobile Access

Use your smartphone, tablet or computer to access your Scout system from anywhere in world, anytime.

## Custom Alerts

You tell us how and when you want to be alerted of activity with custom texts, e-mails, phone calls and more.

## Personalized Responses

You tell us how to respond to an alarm. Whether you want to call the police, or call a neighbor, we've got you covered.

## Intuitive Modes

Scout keeps your home safe while you're away, on vacation or even at home with alarm modes built around you.

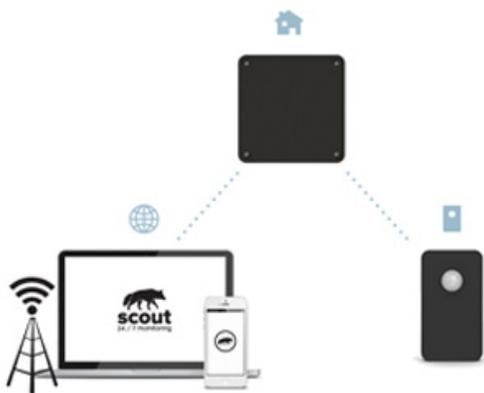

## Instant Access

Give friends, family, babysitters, household helpers, and others instant access to your home with no hassle.

## Plays Nicely With Others

Scout is compatible with many other security and home automation devices, making it the perfect system for your smart home.

## Monitoring Modernized

Scout's monitoring options are month-to-month. There are no long-term contracts or hidden fees, ever. Our system gives you the flexibility to choose whether you want to self-monitor or have your home professionally monitored. There are costs associated with monitoring, but we promise that they'll always be simple and transparent. Monitoring plans range from \$4.99 to \$19.99 a month.

# state-of-the-art hardware

## Thoughtfully Designed, With You in Mind

Scout's modern design complements a modern home - no more beige boxes stuffed into every corner. With Scout, you'll repel criminals without repelling your sense of style. Scout is modular so the system is portable from house-to-house. Each component can be repurposed as needed. It's a great solution for both renters and homeowners alike.

### Superior Range

Scout is built on a wireless, mesh network that is both self-healing and can span larger distances.

### Cellular Backup

Each and every Scout system has a cellular chip inside that will keep your system running, even when the internet is down.

### Portable & Modular

Scout can be seamlessly moved from house to house and each sensor can be repurposed within the system as needed.

### Battery Backup

The power can go down, but Scout won't. Each Scout system includes a backup battery to keep you secure 24/7.

### Seamless Installation

Every component in the Scout system either stands freely, or can be adhered to the wall through a simple push-and-stick install.

# hub

**dimensions:**

L: 135 mm  
W: 135 mm  
D: 28.5 mm

**available in:**

midnight

walnut

color: arctic

## hub

### benefits

- the hub is the brain of the Scout system, communicating to all of the sensors, Scout's servers and the user
- cellular backup built-in when internet is unavailable
- battery backup in the event of a power outage
- receive custom alerts (text, e-mail, http and phone calls) based on activity and set custom responses

### tech specs

- wall-powered (primarily) with battery backup
- battery backup uptime of over 24 hours
- 110v / 220v compatible
- 106 db alarm
- 3G cellular chip and international SIM card included
- ethernet port connects to user's router
- 802.15.4 IEEE mesh device
- range greater than 100 ft.

walnut

color: arctic

## entry door panel

### benefits

- wireless RFID reader replaces dated keypads
- arms and disarms the Scout system at entry doors with RFID fobs (2 included) when smartphone isn't available
- grant and revoke security permissions for guests
- monitors entry door opening and closing
- battery-powered for easy DIY install
- 106 db siren will make sure intruders don't stick around

### tech specs

- wireless, radio frequency identification (RFID) reader
- operates with 125khz RFID fobs (2) and stickers (1)
- magnetic reed switch
- battery-powered (2 x CR123)
- battery life of over 1 year
- 802.15.4 IEEE mesh device
- mesh range greater than 100 ft.
- 106 db siren

mot

**dimensions:**

L: 90 mm

W: 50 mm

D: 27.8 mm

**available in:**

midnight

walnut

color: arctic

**motion sensor**

benefits

- monitor motion as it occurs in a home
- great for rooms with sliding glass doors, bay windows or multiple entry points
- receive custom alerts, or enable custom responses
- battery-powered for easy DIY install
- free-standing, push-and-stick installation or flat mount

tech specs

- wireless, passive infrared (PIR) motion sensor
- detects motion up to 20 - 30 ft. away
- field of view of 90 degrees
- battery-powered (2 x CR2)
- battery life of over 1 year
- 802.15.4 IEEE mesh device
- mesh range greater than 100 ft.

w&d

**dimensions:**

L: 65.2 mm

W: 47.5 mm

D: 19.8 mm

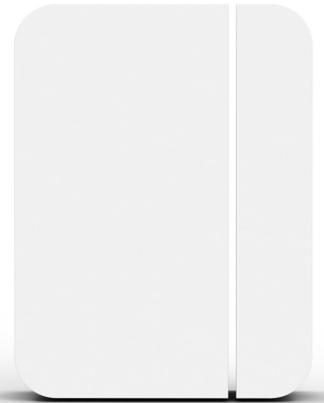

**available in:**

midnight

walnut

color: arctic

## window and door sensor

### benefits

- monitor the opening and closing of windows or doors
- receive custom alerts, or enable custom responses based on activity
- battery-powered for easy DIY install
- simple push-and-stick adhesive mounting
- great for tracking activity on safes and cabinets

### tech specs

- magnetic reed switch
- battery-powered (1 x CR2)
- battery life of over 1 year
- 802.15.4 IEEE mesh device
- range greater than 100 ft.
